# **Control** your hearing aids directly from an **Android** phone

Change programs   Adjust volume

It's never been easier or more discreet to control Beltone hearing aids. The free Beltone HearPlus app™ is the most advanced of its kind for hearing aid wearers. Using the Beltone HearPlus app, clients can change volume, settings and programs, check battery status and even locate a lost hearing aid in a simple and intuitive way directly from the most popular Android phone model, Samsung Galaxy S5. It's as easy as sending a text message or checking the weather. And to the rest of the world, it looks as if they are doing precisely that.

Offer your clients something truly revolutionary. Free of charge. Explore the possibilities at www.beltone-hearing.com/hearplus
